# **New Testing Feature, CDS Connect Authoring Tool Demonstration**

## Future Planning for CDS Connect Authoring Tool

# CDS Authoring Tool - Potential FY2019 Features Review

- CQL authoring for other versions of FHIR
- Integration w/ the CDS Connect repository
- Additional user-facing testing capabilities
- Comments
- Additional terminology sources for value set / code searches
- CQL 1.2 error handling
- Additional CQL operators (math, timing, etc.)
- Advanced query construction
- Import & reference external CQL libraries
- Direct CQL entry
- Cross-artifact re-usable elements
- Additional CDS types
- Revision control

*CQL = Clinical Quality Language  
FHIR = Fast Healthcare Interoperability  
Resources*

# CDS Hooks Prototype Demonstration

# **Groups Capability: User's Guide (Group Workflow)**

# CDS Connect: Long-Term Vision for Governance

- Long-term vision described in CDS Connect Systems Document
  - Simplified diagram shown here
- Key functionality involves being able to separate users into groups

# Groups in CDS Connect: Approach

- Leveraged two Drupal modules
  - Group
  - Group Node
- Allows groups to be created which can be assigned:
  - Users
  - Content (artifacts)
- Group Nodes are entities which record the relationship between users/artifacts and a group
  - Can link users/artifacts to more than one group
- Allows a finer granularity of permissions
  - E.g., users outside the group cannot see unpublished artifacts linked to the group

# CDS Connect: Workflow Within a Group

- Iterative workflow enabled by well-defined user roles
  - Author
  - Editor
  - Publisher
  - Governor
- Only artifacts in the “Published” state are visible to external site visitors

In 2016, AHRQ launched a program of grants and contracts aimed at helping health care providers move patient-centered outcomes research (PCOR) evidence into practice through clinical decision support (CDS). AHRQ advances the science of CDS by supporting implementers, clinicians, and technology vendors in developing CDS tools that are shareable, standards-based, publicly-available, and patient-centered. The four components are detailed below.

## Learning Network

AHRQ awarded RTI International a cooperative agreement to become the Patient-Centered Clinical Decision Support Learning Network (PCCDS-LN). The PCCDS-LN is building a community of researchers, clinicians, professional societies, and others that is exploring and advancing patient-centered CDS.

<https://pccds-ln.org>

## CDS Connect

AHRQ awarded the MITRE Corporation a contract to develop "CDS Connect", an online web presence that will function as a repository of CDS artifacts and create prototype infrastructure for sharing CDS across different health care settings and technologies. MITRE will also develop, pilot, and share CDS artifacts on CDS Connect as a proof-of-concept.
